PROGRESS REPORT

COMMUNITY SERVICES CONTRIBUTION PROGRAM

FINAL PROGRAM YEAR (1980)

Prepared by:	**Ian D. Cross** **Ottawa, Ontario**
Prepared for:	**Planning Division** **Policy Development and Research Sector** **Canada Mortgage and Housing Corporation** **June, 1984**
CSCP Program Administrator:	**W.P. Keilhofer**

INTRODUCTION

The final payment under the Community Services Contribution Program, made in March 1984, marked the end of the Second (1980) Program Year and the fulfillment of the federal government's $400.3 million commitment to wide-ranging assistance for capital improvements in Canadian municipalities. This report, consistent with Article 9 of the Federal/Provincial Agreements, will review the use of the $250 million in federal contributions spent under the Second Program Year (January 1, 1980 to February 28, 1984).

Background

The introduction of Section 54 of the National Housing Act on 16 March 1979 signified a major shift in the federal approach to providing aid to municipalities. By consolidating the Neighbourhood Improvement (NIP), Municipal Infrastructure (MIP) and the Municipal Incentive Grant (MIG) programs, and expanding project eligibility criteria, the federal government was able to assist a much wider range of municipal capital projects than had been possible previously.

This new approach offered a number of advantages over the previous programs. Because the Neighbourhood Improvement and Municipal Infrastructure Programs involved project by project cost-sharing, the flow of benefits was significantly influenced by the ability of municipalities and provinces to participate. As a result, wealthier municipalities and provinces tended to receive more benefits since they were better able to bear their share of costs. Municipal governments claimed that such programs distorted local priorities and reduced local autonomy. In addition, the direct involvement of the federal government in program delivery resulted in unnecessary administrative duplication among levels of goverments.

By shifting responsibilities for project selection and day-to-day program administration to the provinces, the Community Services Contribution Program provided greater flexibility; eliminated distortions in the pattern of assistance to provinces; supported provincial initiatives to permit increased local autonomy; and responded to provincial requests for less direct federal involvement in the area of community services and municipal affairs.

PROGRAM OBJECTIVES

1) to provide increased flexibility and wider latitude to the provinces and their municipalities in using federal funds;

2) to enable federal assistance to better respond to local needs and conditions;

3) to reduce duplication in detailed administrative procedures by disentangling the federal government from project-by-project scrutiny;

4) to enhance the degree to which federal assistance meets the priorities of the provinces and municipalities; and

5) to ensure that federal assistance is more equitably available to all provinces.

PROGRAM OPERATION

Under two year agreement signed with each of the Provinces, the Province decided which community services would be eligible for funding, the means of allocating funds to municipalities and the administration of the program within the Province. Federal funds of $150.3 million and $250 million for 1979 and 1980, respectively, were allocated to the Provinces on the basis of a formula (Table 1). By taking direct account of the ability of local government to raise revenues and of the need for services as indicated by the urban population, this formula ensured a more equitable distribution of federal assistance than under the old programs.

TABLE 1 CSCP Allocations to the Provinces for the 1979 and 1980 Program Years (P.Y.) ($ millions)

B.C.	15.15	25.20
	$150.30M	$250.00M

The introduction of the CSCP represented an important change in program delivery because the federal government was no longer involved in detailed project-by-project scrutiny. Administration of the program at the project level was now carried out entirely by the Provinces. This approach not only provided the Provinces with greater flexibility in allocating funds, it also reduced program administration costs by eliminating duplication of effort between the two levels of government. The primary role of the Provinces was also consistent with the constitutional responsibility of the Provinces in matters of municipal affairs.

The types of community services eligible for funding in each Province were selected by the Provinces from a broad range of eligible capital expenditures developed in consultation with the Provinces. These included water and sewer facilities, neighbourhood improvement, and social, cultural and recreational facilities. Thus funds could continue to be allocated for all expenditures assisted under the old programs, or for any other eligible capital expenditure. In addition, Provinces determined the criteria to be used in allocating funds to municipalities. However, both the eligible services and allocation criteria were to be submitted to the federal government. Once these were accepted, Provinces allotted funds to eligible municipal projects. Provinces then submitted the list of projects to the federal government and, again, these had to be accepted as being consistent with the eligible services and method of allocation previously prepared by the Province and agreed to. Changes to the allocations could be made throughout the program year, but these too had to be submitted for acceptance. This procedure ensured federal accountability for program expenditures.

Consistent with the block-funding philosophy of the program, the Provinces were responsible for the payment of funds to municipalities. Payment of the federal contribution to the projects was made on the basis of certified financial statements of account submitted by the Provinces for expenditures incurred on designated projects. Under the original terms of the Agreements, up to five such claims could be submitted against commitments made under each of the two program years, the federal payment to be made, if possible, within thirty days of receipt of the request. Funds were committed for projects initiated during the Second Program Year - originally 1 January 1980 to 31 March 1982 - and were to be disbursed to the Provinces for remittance to the municipalities during the 1981/82 fiscal year.

In order to allow more flexibility in the timing of projects and to avoid any risk of lapsing federal funds for which projects were eligible, the federal government in the autumn of 1981 offered to the provinces an extension of up to two years. Thus expenditures on designated projects could be incurred and claims for payment submitted up to 28 February 1984, with final federal payments being made by 31 March 1984. The level of available funding for the Second Program Year remained fixed at the original $250 million commitment. As was the case in 1979, payment procedures permitted reductions to municipal carrying costs, since the federal share could be made available before completion of the project as actual expenditures were incurred.

The extension proved to be widely popular and efficacious. As shown in Table 2, eight of the Provinces took advantage of the extension and while $52 176 was lapsed in the 1979 Program Year, take up of all federal funds occurred for the Second Program Year (1980).

ELIGIBLE COMMUNITY SERVICES

The list of eligible community services agreed to by the Government of Canada and the Provinces included:

1) planning and installation of sewage trunk lines and treatment plants in new and existing areas;

2) planning and installation of community water supply facilities for new and existing areas, including trucked water supplies, as well as piped water supplies;

3) planning and installation of trunk storm sewer systems, holding tanks and any treatment facilities required in new and existing areas;

4) planning and installation of sewer and water site services provided for residential land development conforming to specified density criteria;

5) social and cultural facilities, including day care centres, community centres and libraries;

6) community recreational facilities, including community centres, senior citizens' recreation centres, neighbourhood ice rinks, parks and similar facilities;

7) neighbourhood improvement and conservation, including planning for upgrading older low-income neighbourhoods, provision of open space and community facilities on a neighbourhood scale, relocation of people displaced by the provision of additional facilities, upgrading local services within the neighbourhood where these are deficient and similar items:

8) non-profit housing, the municipal equity;

9) upgrading and insulation of municipal buildings and community facilities;

10) facilities which convert municipal waste (garbage, sludge, etc.) to energy production; and

11) other municipal capital works specified in the federal-provincial operating agreement.

THE FINAL PROGRAM YEAR: A NATIONAL PERSPECTIVE

During the 1980 Program Year, the Community Services Contribution Program assisted 1 996 projects in 1 255 communities across Canada. Although the number of projects increased by about one quarter over the previous program year, when the Program undertook contributions to 1 562 projects, total available funding had been augumented by over 60 per cent, indicating a significant rise in the level of individual federal grants (the average grant actually increased from $96 000 in 1979 to $125 000 in 1980). It is estimated that the $250 million in federal contributions committed in 1980 (the year in which most funds were allocated) represented approximately 5.1 per cent of total capital expenditures made by municipal governments in that year.

As in the First Program Year, the use of federal CSCP funds continued to be noteworthy for the variety of projects which received assistance (Table 3). The dominant expenditure category selected by the Provinces was again sewer and water infrastructure, which increased slightly in the proportion of funds allocated to it from 58.4 per cent in 1979 ($87.7 million) to 60.3 per cent ($150.7 million) in 1980. As shown in Table 3, emphasis on infrastructure shifted from treatment to sewage collection and water supply facilities; collectively, allocations to infrastructure other than wastewater treatment increased from 36.9 per cent to 45.2 per cent year over year.

Proportional funding for most other categories declined somewhat in 1980, with the exception of cultural and community facilities. This category increased significantly due largely to increased funding particularly for librairies in Quebec. The proportion of allocations for neighbourhood improvement also rose marginally, although it should be noted that this categorization may be misleading since many CSCP projects in other categories would likely have qualified under the old NIP criteria. In general, projects were only classified as neighbourhood improvement if they were identified as such in the provincial allocations.

TABLE 3

Allocation of 1980 CSCP Funds by Type of Project: Canada (Comparable figures for 1979 are shown in brackets)

Type of Project	$	% of Total CSCP Funds	Number of Projects	Number of Communities*
Sewage Treatment Facilities	37 747 492 (32 222 088)	15.1 (21.5)	98 (122)	87 (111)

TOTAL	$250 000 000 (150 300 000)	100.0 (100.0)	1 996 projects & 11 633 units (1 562 projects) (& 10 901 units)	1 255 (937)

* Total does not equal sum of column due to double-counting.

** Includes 38 municipal non-profit housing projects in Ontario.

Projects assisted by the Program amounted to approximately one quarter of total local government capital expenditures in 1980; nearly $1.1 billion (estimated) in public works received CSCP contributions. Federal allocations under the Program represented, on average 22.9 per cent of total costs on designated projects, a slight increase from 21.1 per cent in the previous year. Provincial participation in projects was also significant, although somewhat lower than the federal CSCP share, and varied considerably from one province to another (Table 4).

TABLE 4 1980 CSCP and Provincial Contribution Compared To Total (Est.) Project Expenditures ($ millions)

TOTAL	$250.00	(22.9)	$195.36	(17.9)	$1 093.94

* Estimated from certified statements of account submitted by the provinces.

Overall, in the distribution of funds according to community size (Table 5), there was a shift towards smaller municipalities in 1980, away from centres over 50,000 population. Exceptions to this pattern occurred in New Brunswick and British Columbia. The distribution in Manitoba changed little since it was essentially fixed by the allocation criteria.

TABLE 5 CSCP Allocations by Size of Community for 1979 and 1980 (per cent)

PROVINCIAL ALLOCATION FORMULAS AND ALLOCATIONS TO MUNICIPAL PROJECTS
1980 PROGRAM YEAR

The following sections describe the 1980 municipal allocations in each province. Included is a brief summary of the allocations and comparison with those made in 1979, the eligible expenditures and allocation criteria as established by the provinces and forming the appendices to the federal/provincial agreements, and a project by project list of the allocations themselves, including contributions of the federal government and, where applicable, those of the provinces.

ABBREVIATIONS used to denote type of municipality:

bor	Borough
c	City
co	County
ct	Canton
d	District
dm	District Municipality
ham	Hamlet
id	Improvement District
lgc	Local Government Community
lgd	Local Government District
lid	Local Improvement District
md	Municipal District
mun	Municipality
p	Parish
PUC	Public Utility Commission
pv	Police Village
rcm	Regional County Municipality
rd	Rural District
RD	Regional District
rm	Rural Municipality
und	Undesignated
sv	Summer Village
twp	Township
t	Town
vl	Village

NEWFOUNDLAND

Federal contributions to Newfoundland municipalities for the 1980 Program Year followed a similar pattern to that of 1979. Close to 90 per cent of allocations were used to assist municipal infrastructure, a reflection of the emphasis placed on these facilities by the Province in the allocation criteria agreed to under the Program. In addition, neighbourhood improvement projects in Corner Brook (Corner Brook East Area) and Grand Falls (Grenfell Heights Area) each received $347 500 in federal assistance, and a variety of other municipal facilities were aided in smaller Newfoundland communities.

Almost one third of 1980 CSCP funds were contributed to projects in communities with fewer than 1 000 inhabitants. Overall, close to 40 per cent of the Newfoundland population resided in communities receiving program assistance.

Provincial assistance to projects is provided by way of a subsidy on annual debenture debt servicing payments to the Municipal Finance Corporation. The amount of assistance varies according to the fiscal condition of the municipality. St. John's, due to the terms of its city charter, was the only Newfoundland community eligible to receive a provincial capital grant in lieu of annual debt assistance.

TABLE 6: SUMMARY OF 1980 MUNICIPAL ALLOCATIONS IN NEWFOUNDLAND

Category	CSCP Contribution	% of CSCP Total	No. of Projects	No. of* Communities
I Water & Sewer Trunk Lines, Sewage Treatment	$3 086 750	44.5	22	18
II Water & Sewer Distribution Systems	2 989 950	43.0	40	40
III Neighbourhood Improvement	695 000	10.0	2	2
IV Municipal Buildings	178 300	2.6	11	11
V Solid Waste Disposal	-	-	-	-
TOTAL	$6 950 000	100.0	75	64

*Total does not equal sum of column due to doublecounting.

A. ELIGIBLE PROJECTS

Funds were allocated among five categories of projects up to a maximum fixed share.

1. Water and Sewer, trunk mains, outfalls, treatment plants, intake works and pumping stations. Maximum federal contribution - 50 per cent of project costs.

2. Water and Sewer Distribution Systems (not including house connections) to service new and existing residential development at acceptable densities. Maximum federal contribution - 35 per cent of project costs.

3. Neighbourhood Improvement to cover improvement and replacement of municipal and public utility services; acquisition and clearance of land; the clearance of dilapidated buildings; the provision of local parks, playgrounds and parking lots; and improvements to the amenity of the neighbourhood. Applicable only once and when in accordance with an approved plan for a designated area. Maximum federal contribution - 50 per cent of costs.

4. Construction of Municipal Buildings including town offices, firehalls and municipal depots. Maximum federal contribution - 10 per cent of costs.

5. Construction of Solid Waste Disposal Facilities - Maximum federal contribution - 10 per cent of costs.

The eligible expenditures listed above included the cost of planning, engineering and interim financing, but with the exception of 3 above, excluded the cost of land acquisition.

B. ALLOCATION CRITERIA

1. Allocations were made on the basis of applications subject to review and recommendation by the Municipal Capital Board and approval by the Minister of Municipal Affairs. Applications were reviewed and priorities established on the basis of:

   - forecasts of capital expenditure requirements of municipalities; and
   - the municipal tax base to support such expenditures.

2. The maximum federal contribution limitations (above) and the percentage of funds allocated (shown below) could be waived by the Minister during the last three months of the Program Year if federal funds remained to be allocated at that time.

	Percentage of Funds Available
1. Water and sewer trunk mains	50
2. Water and sewer distribution	35
3. Neighbourhood improvement	10
4. Municipal buildings and solid waste	5

The program was administered jointly with the Newfoundland Department of Municipal Affairs.

PRINCE EDWARD ISLAND

The distribution of program funds among major expenditure categories underwent significant changes in Prince Edward Island from the First to the Second Program Year. Funding for infrastructure almost doubled, from 26 per cent of allocations in 1979 to 47.2 per cent in 1980, while the proportion of federal funds for streets and sidewalks increased from less than one per cent to almost 27 per cent in the second year.

Fire protection facilities, which accounted for slightly over half of 1979 CSCP allocations, decreased to 8.1 per cent in 1980. Although contributions to recreational facilities actually increased in nominal terms, their significance in terms of available funds also declined in the final program year.

TABLE 7: SUMMARY OF 1980 MUNICIPAL ALLOCATIONS IN PRINCE EDWARD ISLAND

Category	CSCP Contribution	% of CSCP Total	No. of Projects	No. of* Communities
I Trunk Mains, Lift Stations, etc.	-	-	-	-
II Water and Sewer	684 208	47.2	10	10
Streets and Sidewalks	387 638	26.7	9	8
Fire Protection	117 321	8.1	8	8
III Social Facilities	6 888	0.5	2	2
Recreational Facilities	203 220	14.0	7	6
Municipal Buildings	50 725	3.5	1	1
TOTAL	$1 450 000	100.0	37	24

*Total does not equal sum of column due to doublecounting.

A. ELIGIBLE PROJECTS

Funds were allocated on a project-by-project basis among four categories of eligible expenditure.

1. Category I - The installation or upgrading of sewage treatment facilities; treatment plants, lift stations and force mains, and sewage trunk mains. Cost-shared at Municipal 25 per cent to a maximum of $120 per unit per year with the balance shared 50/50 by the Provincial and Federal Governments.

2. Category II - The upgrading and/or extension of new or existing municipal services; storm and sanitary sewer lines (excluding new developments), water distribution systems, culverts, curbs, gutters, sidewalks, paving, street lights, fire and police alarm systems, traffic lights, street name signs, landscaping of street boulevards, and fire halls. Cost-shared at Municipal 31¼ per cent, Federal 50 per cent and Privincial 18¾ per cent.

3. Category III - Social Facilities; community centres, libraries, museums, medical clinics, church facilities, service club facilities and day care centres.
   Recreational Facilities; ice rinks, curling rinks, tennis courts, parks, swimming pools, etc.
   Cost-shared at Municipal 62½ per cent, Federal 25 per cent and Provincial 12½ per cent.

4. Category IV - Facilities to convert municipal waste to energy. Eligible for a 50 per cent grant to cover capital costs.

B. ALLOCATION CRITERIA

The following factors were considered in allocating funds:

1. Will the project provide an essential community service?
2. How much assistance did the municipality receive under the previous NIP and MIP programs?
3. Can the municipality meet its share of the cost of the project?
4. How much of the available funding would the project require?
5. Within what category (priority) does the project fall?
6. Will sewer and water projects alleviate an evident environmental hazard?

The program was jointly administered with the Department of Community & Cultural Affairs.

1980 Municipal Allocations in Prince Edward Island

Community	Type	Project Description	Provincial* Contribution	Federal CSCP Contribution
Abram's Village	vl	Sewage Collection System	$ 112,500.00	$ 141,867.97

NOVA SCOTIA

Municipal infrastructure projects accounted for 97 per cent of the use of CSCP funds by Nova Scotia municipalities in the 1980 Program Year, compared with 65 per cent in 1979. Water and sewer undertakings received the bulk of these funds and accounted for 93 of the total 108 projects carried out in 1980. The increased emphasis on infrastructure was accompanied by an increase of almost 150 per cent in the amount of the average CSCP contribution, from about $35 000 per project in 1979 to $85 000 in 1980.

The largest single project to receive assistance was the Lakeside-Timberlea sewerage scheme in the County of Halifax. Designed to service a large area south-west of the provincial capital, this undertaking was aided by $2.1 million in federal contributions during the Second Program year. Related expansion of the Mill Cove sewage treatment plant received an additional $225 000 in assistance.

As in 1979, a slightly higher than average proportion of funds in Nova Scotia continued to be allocated to communities over 10 000 inhabitants. However, the percentage of funds made available to centres under 5 000 population increased from 4.3 in 1979 to 12.3 in 1980.

TABLE 8: SUMMARY OF 1980 MUNICIPAL ALLOCATIONS IN NOVA SCOTIA

Category	CSCP Contribution	% of CSCP Total	No. of Projects	No. of* Communities

TOTAL	$ 9 200 000	100.0	108	41

*Total does not equal sum of column due to doublecounting.

ELIGIBLE PROJECTS

Funds were available for all purposes for which municipalities are empowered to spend capital funds, excepting capital projects for purposes of education, health, social services and administration of justice.

Eligible expenditures included directly-related study costs plus interim financing costs incurred between expenditure and receipt of CSCP funds. However, charges on existing or future debentures were not eligible for cost-sharing.

ALLOCATION CRITERIA

Priority projects were designated by the Nova Scotia Minister of Municipal Affairs in conjunction with an advisory committee composed of representatives from provincial departments and municipalities. Grants were a minimum of 16.67 per cent to a maximum of 50 per cent of the lesser of actual or estimated costs.

The committee determined projects within the following priorities:

FIRST PRIORITY: Category I

A. Upgrading of sewer and water system capacities.
B. Intermunicipal sewer and water systems.
C. New sewer and water systems.
D. Sidewalks, curbs and pavement.
E. Solid waste disposal systems.

SECOND PRIORITY: Category II

A. Renewal of deteriorated sewer and water systems.
B. Extensions to existing systems.

THIRD PRIORITY: Category III

Special projects (all other municipal capital expenditures).

Funds were allocated upon application. Determination of priorities within categories was the responsibility of the Minister acting on the advice of the committee.

Under the Provincial Supplementary Program, sewer and water projects received grants from the Department of Municipal Affairs equal to 50 per cent of the federal CSCP contribution. In addition, the Nova Scotia Department of the Environment provided grants of up to 20 per cent of project costs for some infrastructure undertakings. Combined federal and provincial grants were held to a maximum of 80 per cent of total project costs.

Administration of the program was carried out in cooperation with the Department of Municipal Affairs.

1980 Municipal Allocations in Nova Scotia

Community	Type	Project Description	Provincial* Contribution	Federal CSCP Contribution

41 communities		108 projects	$18,437,288	$ 9,200,000

NEW BRUNSWICK

Following the pattern of the previous year, a large proportion of 1980 funds in New Brunswick were allocated for infrastructure projects. In 1980, emphasis shifted from sewer systems to the assistance of sewage treatment facilities, as provided for in the agreed-to allocation criteria respecting the Second Program Year (below).

A $1.04 million CSCP contribution to assist neighbourhood improvement in Saint John accounted for over half of all non-infrastructure allocations. In addition, many smaller grants were provided for street and sidewalk upgrading, recreational facilities and municipal buildings in communities of under 5 000.

The province's two largest municipalities, Saint John and Moncton, accounted for almost one third of 1980 CSCP funding. Smaller centres of under 5 000 inhabitants accounted for 46 per cent of allocations and 86 per cent of all projects.

TABLE 9: SUMMARY OF 1980 MUNICIPAL ALLOCATIONS IN NEW BRUNSWICK

Category	CSCP Contribution	% of CSCP Total	No. of Projects	No. of* Communities
Sewage Treatment Projects	$2 424 750	34.9	10	10
Water and Sewer Systems				
Sewers	907 633	13.1	19	17
Water	251 317	3.6	10	10
Water & Sewers	1 439 583	20.7	12	12
Other (including Storm Sewers)	1 926 717	27.7	66	66
TOTAL	$6 950 000	100.0	117**	101

*Total does not equal sum of column due to doublecounting.

** This number represents only the number of individual CSCP allocations shown on certified statements of account. In New Brunswick many federal contributions were made to projects that included work under more than one category (e.g. "upgrade streets and install storm sewers"). The categorization of allocations shown above is therefore judgemental, and is intended only to describe progam activity in general terms.

A. ELIGIBLE PROJECTS

The following projects were eligible for assistance:

1. Planning and installation of sewage treatment facilities eligible for grant assistance under Part VIII of the National Housing Act, in effect 1978 (Refers to Municipal Infrastructure Program).
2. Planning and installation of new water and sewer systems or extensions to existing systems.
3. Planning and installation of storm sewer systems, holding tanks or treatment facilities required for storm sewers.
4. Neighbourhood improvement and conservation programs including the following:
    - (a) planning for urban renewal
    - (b) development of community facilities on neighbourhood basis
    - (c) relocation of people displaced by urban renewal
    - (d) up-grading of local services
5. Construction of municipal streets, sidewalks, curbs and gutters.
6. Construction of solid waste disposal facilities including those involved in the production of energy.
7. Construction and renovation (including insulation) of municipal buildings which are used in the administration of municipal services.
8. Purchase of property to provide municipal services or to consolidate land holdings as part of an urban development project.
9. Construction of social and cultural facilities including the following:
    - (a) community centres
    - (b) libraries
10. Construction of recreational facilities including the following:
    - (a) recreation halls
    - (b) sports arenas
    - (c) parks
    - (d) outdoor sport facilities

B. ALLOCATION CRITERIA

For 1980, funds were allocated on the following basis.

a) 35% to sewage treatment projects.

Assistance for sewage treatment projects consisted of a grant of 20% of the eligible capital cost plus the high cost grant formula used in the terminated sewage treatment programs contained in Part VIII of the National Housing Act.

b) 15% to projects involving the construction of water and sewage systems.

Project assistance equalled the amount of capital funds required, after all other grants are taken into consideration, to ensure maximum annual user charges as follows:

Lot Frontage up to 75' - $190 (both services) plus operation and maintenance.

Lot Frontages 76' to 100' - $215 (both services) plus operation and maintenance.

Lot Frontages 101' to 125' - $240 (both services) plus operation and maintenance.

c) 50% to projects included in "A" (Eligible Projects) and divided among Municipalities on a formula basis.

Municipalities received the same proportion of Section c) funds as they received in unconditional grant funds. These latter funds were distributed to all municipalities on the basis of a formula which took into consideration ability to pay (assessment base), density of services (road mileage), and size (population).

Municipalities receiving Program funds under a) could also receive funds under b) or c).

Municipalities receiving Program funds under b) could not receive funds under c).

Municipalities could use c) funds for amortization of water and sewage projects only if they had not received Program funds under b).

The program was administered jointly with the Ministry of Municipal Affairs.

1980 Municipal Allocations in New Brunswick

Community	Type	Project Description	Provincial * Contribution	Federal CSCP Contribution
Aroostook	vl	Improvements to Water System	$ -	$ 1,600

101 Communities		117 Allocations	$5,308,976	$6,950,000

QUEBEC

The $78.45 million provided to Quebec municipalities in 1980 were allocated under three sub-programs:

1) Programme d'amélioration des équipements communautaires (PAEC) (Community Services Improvement Program). 1980 CSCP allocation: $42.87M.

2) Programme d'aide à la densification (PAD) (Infill Assistance Program). 1980 CSCP allocation: $6.78M.

3) Programme d'aide à l'implantation des reseaux d'aqueduc (PAIRA) (Water Supply Assistance Program). 1980 CSCP allocation: $27.82M.

In addition, a special grant of $983 500 was provided to the Outaouais Regional Community for construction of sewage treatment facilities.

Two other sub-programs which operated in the 1979 Program Year (one for wastewater treatment, the other for the development of metropolitan parks) were not funded in 1980.

As in 1979, the operation of the Program in Quebec during 1980 was noteworthy for the diversity of allocations made and for the number of projects assisted; a total of 507 Quebec municipalities undertook 845 designated projects. In addition, grants were provided to municipalities to encourage construction of 9 038 medium density housing units.

The distribution of 1980 funds among major project categories differed relatively little from the previous year. Infrastructure allocations again accounted for a comparatively low proportion of program funds (36.8%), although still comprising the largest single type of project. However, almost all infrastructure activity consisted of sewer and water services (and this in communities under 5,000 population) rather than sewage treatment facilities.

Contributions under the PAD component decreased proportionally by almost half (from 15.5% to 8.6% of allocations year-to-year), while contributions to recreation facilities also declined slightly. Community and cultural facilities, which received 3.6 per cent of 1979 funds, increased to 15 per cent of allocations in 1980. This change was largely attributable to the inclusion of major funding for library facilities in the Province; in 1980, the CSCP contributed $8.8 million to assist with the construction, enlargement or renovation of 34 municipal library facilities. Another area of increased funding was neighbourhood improvement; the four projects assisted in 1980 received $1.3 million in federal contributions (see Table 10).

The 1980 allocations also display a significant shift in funding from larger centres to small communities. Contributions to projects in cities over 100 000 population declined from 47 per cent of 1979 allocations to 27 per cent of 1980 funds; allocations to communities of less than 5 000 inhabitants increased from 32 per cent in 1979 to 47 per cent in 1980. In large part, this change was due to the fact that in 1980 the two sub-programs directed towards metropolitan parks and wastewater treatment were inoperative.

Table 10: SUMMARY OF 1980 MUNICIPAL ALLOCATIONS IN QUEBEC

Category	CSCP Contribution	% of CSCP Total	No. of Projects	Number of* Communities
Sewage Treatment	$ 1 148 000	1.5	2	2
Sewer and Water	27 659 000	35.3	93	85
Recreational Facilities	21 456 600	27.4	420	235
Cultural & Community Facilities	11 836 400	15.1	100	87
Municipal Buildings	7 470 500	9.5	211	183
Fire Protection	831 000	1.1	15	15
NIP	1 270 000	1.6	4	4
Housing (PAD)	6 778 500	8.6	9 038 units	118
TOTAL	$78 450 000	100.1	845 projects & 9 038 units	507

*Total does not equal column due to doublecounting.

A unique feature of the CSCP in Quebec was the provision made in the allocation criteria respecting the PAEC and PAIRA components whereby levels of Program contributions were explicitly tied to the relative fiscal well-being of recipient communities. Hence municipalities which were less able to raise own-source revenues received a larger share of total project costs in the form of federal and provincial grants. This feature enabled grants to be made for worthwhile projects in many communities, while ensuring that needier municipalities received the bulk of available funds. As shown in Table 11 below, for allocations made in 1980 under the PAEC component communities in better fiscal circumstances accounted for 49 per cent of projects, but received only 17 per cent of PAEC funds.

Table 11: PAEC ALLOCATIONS RELATIVE TO FISCAL INDEX

Municipal Fiscal Index*	Fed./Prov. Grant Share of eligible costs (PAEC)	Federal CSCP Contributions (PAEC) ($000's)	(%)	No. of Projects Funded (PAEC) (Number)	(%)
0	25%	$7 426	17.3%	369	49.2%
0 -20	50%	8 089	18.9%	160	21.3%
20-40	66 2/3%	17 635	41.1%	118	15.7%
40+	75%	9 715	22.7%	103	13.7%
		$42 865	100.0	750	100.0

*Difference between the tax effort index and the global wealth index.

ELIGIBLE PROJECTS AND ALLOCATION CRITERIA

1. Programme d'amélioration des équipements communautaires (PAEC) (Community Services Improvement Program)

In general, special rehabilitation, protection, conservation, improvement and beautification works which were likely to contribute to the quality of community life were eligible. Infrastructure, water supply and sewer work, in no case, were eligible under the programme with the exception of work for municipalities which had submitted a grant application under the Neighbourhood Improvement Programme prior to 1 August 1979. All municipalities were eligible to receive assistance under the Program.

1. The acquisition, clearing, regrouping and development of lots for housing purposes[1] or for the purpose of installing or improving community equipment or services such as municipal parks, roadside rest areas, picnic areas and bus stop shelters.

2. The acquisition and development of unused premises (abandoned units, schools, office buildings, businesses, plants, etc.) to recycle them for housing[1], municipal services or for community recreation and leisure activities.

3. The development or improvement of public facilities (public buildings, sidewalks, parking lots, etc.) to facilitate access and use thereof by the handicapped.

4. Certain work which the municipality could not otherwise carry out and which would result in returning to the population certain spaces deemed essential to the quality of life of a neighbourhood or of a municipality or which were necessary to achieve other elements of the programme, namely:

   - the development of the banks of waterways (municipal);
   - the cleaning of municipal rights of way;
   - the creation of pedestrian walkways;
   - artistic investments to improve buildings, squares and municipal parks.

---

[1] When the unused lot or premises were intended for housing purposes, only properties sold to non-profit agencies, Municipal Housing Boards or to housing co-operatives were eligible under the programme and only the loss of money between the purchase price and the income from its disposal was eligible for a grant, the proceeds from the disposal being at least equivalent to that of the municipal assessment.

Under the PAEC component, the level of combined federal and provincial grants was a function of the difference between the fiscal effort index and the global wealth index and varied from a high of 75 per cent to a minimum of 25 per cent of eligible costs. Grants were cost-shared 75 per cent federal, 25 per cent provincial.

2. Programme d'aide à la densification (PAD) (Infill Assistance Program) - Modelled on the old federal Municipal Incentive Grant Program, a grant was made to municipalities of $1 000 for each moderate income dwelling unit (including rehabilitation and/or recycling costs in excess of $12 000) built at densities greater than 10 units/acre (25 u/ha). Cost-shared 75 per cent federal, 25 per cent provincial.

   The funds were made available to local governments to offset the higher costs associated with providing municipal services to medium density housing. This program was therefore unique in that it was result-oriented rather than contributing to individual projects.

3. Programme d'aide a l'implantation des réseaux d'aqueduc (PAIRA) (Assistance Program for the Installation of Water Supply Systems) - Assistance to communities under 5 000 population for installation, improvement or expansion of water supply systems. Assistance was available only for built-up areas (2 users per gross acre minimum) and was not intended for opening up undeveloped land. Projects were determined on a priority basis according to the quality of drinking water in area.

   Grants of up to 75 per cent of project costs were available, cost-shared 25 per cent federal, 75 per cent provincial. (Under an amendment accepted in April, 1982, the federal grant share could vary as high as 75 per cent of total assistance).

   Provincial contributions in excess of $100 000 were disbursed in installments over a ten year period.

   The program was administered in cooperation with the Ministère des Affaires municipales.

Note: In order to avoid confusion between communities with similar names, projects under PAEC and PAIRA are listed according to provincial comté. Projects in Quebec City and in municipalities on the Island of Montreal receiving PAEC funds can be found at the end of the PAEC list.

1980 Municipal Allocations in Quebec

Community	Type	Project Description	Provincial Contribution*	Federal CSCP Contribution
			$	$
I - COMMUNITY SERVICES IMPROVEMENT PROGRAM (Programme d'amélioration des équipements communautaires) (PAEC):				
County of Abitibi - Est**				
Lebel-sur-Quévillon	t	Renovation of the Open Air Centre (Phase 2)	557	1,670
Senneterre	t	Construction of a Municipal Garage	48,950	146,850

ONTARIO

The $85.95 million in 1980 CSCP contributions to Ontario communities were administered in cooperation with two provincial ministries.

Sixty per cent of program funds ($51.6 million), under the responsibility of the Ontario Ministry of Environment, were made available for municipal infrastructure. The program assisted construction of many major sewer and water projects in communities ranging in size from villages to regional municipalities. The average CSCP contribution per project reached $206 000, an increase of 50 per cent over that for the 1979 program year, and a total of 38 projects received combined federal (CSCP) and provincial assistance in excess of $1 million. Among the most significant undertakings was the York/Durham Sewage Scheme, the largest sewerage project in Canada and one of the largest in the world. Under the 1979 and 1980 program years, the CSCP provided $8.4 million to assist this project which will ultimately serve a population of 900 000 as well as 6 880 hectares of industrial land in areas adjacent to Metropolitan Toronto.

The other 40 per cent of program funds ($34.35 million) were administered by the Ontario Ministry of Municipal Affairs and Housing. In addition to contributing 50 per cent of the costs of 33 neighbourhood improvement schemes throughout the province, the program acted as an important source of capital for municipal non-profit housing projects. In 1980, assistance was provided for 38 such projects incorporating 2 003 non-profit family housing units and 593 non-profit senior citizen's units. Several of these have received awards for architectural merit; in 1983, for example, the senior citizen's housing in the Township of Osgoode won a Canadian Housing Design Council award for "careful consideration of the needs of senior citizens".

Assistance for Residential Redevelopment Infrastructure Improvements, which in 1979 provided servicing for residential redevelopment of old industrial sites, did not operate in the 1980 program year. The federal funds thus made available were allocated for municipal non-profit housing which increased from $5.2 million in 1979 to $11.68 million in 1980.

TABLE 12: SUMMARY OF 1980 MUNICIPAL ALLOCATIONS IN ONTARIO

I. Ministry of the Environment (Infrastructure):

Category	CSCP Contribution	% of CSCP Total	No. of Projects	No. of* Communities
Sewage Treatment	$25 868 540	30.1	38	33
Trunk Sewer Mains	18 832 392	21.9	90	56
Trunk Water Mains	3 458 547	4.0	74	40
Water Treatment/Supply (including Storage Facilites)	2 498 712	2.9	34	26
Storm Sewers	941 809	1.1	15	12
SUB-TOTAL	$51 600 000	60.0	251	123

II. Ministry of Municipal Affairs and Housing:

Category	CSCP Contribution	% of CSCP Total	No. of Projects	No. of* Communities
Neighbourhood Improvement Projects	$22 670 000	26.4	33	30
Municipal Equity in Non-Profit Housing	11 680 000	13.6	2 596 units	18
SUB-TOTAL	$34 350 000	40.0		45
TOTAL	$85 950 000	100.0	284 projects & 2 596 units	148

*Total does not equal sum of column due to doublecounting.

ELIGIBLE PROJECTS AND ALLOCATION CRITERIA

1. Municipal Infrastructure Projects

All municipalities were eligible for assistance similar to that previously available under MIP. The CSCP grant could not exceed 1/6 of the eligible project cost (defined as the cost of construction as per plans and specifications including land costs and additional costs as approved by MOE). However high cost grants to a maximum of 50 per cent of eligible costs and assistance for regional sewer and water studies was available.

2. Neighbourhood Improvement Projects

All municipalities were eligible though they were required to meet the same pre-conditions for improvement areas that were set out under the former NIP. Total cost of projects was shared 50 per cent CSCP, 25 per cent provincial and 25 per cent municipal.

3. Municipal Equity in Non-Profit Housing

The CSCP grant equalled 10 per cent of the total cost of the project. All municipalities which had a municipal non-profit housing corporation were eligible.

The program was administered jointly with the Ministry of the Environment and the Ministry of Municipal Affairs and Housing.

1980 Municipal Allocations for Infrastructure in Ontario

MANITOBA

Manitoba was the only province to allocate funds to municipalities on a per capita entitlement basis, rather than the cost sharing approach applied under the other federal/provincial agreements. It was therefore possible for municipalities to put forward project applications without the concern of having to bear a fixed share of costs beyond their means. This arrangement probably contributed to the result that, in 1979, CSCP assistance in Manitoba represented the highest share of total project expenditures (48 per cent) of any province. In 1980, however, program contributions amounted to 31 per cent of total expenditures, fifth highest among the provinces.

The pattern of 1980 allocations in Manitoba displayed a significant shift towards municipal infrastructure relative to the previous program year. In 1980, 52.9 per cent of funds were provided for sewer and water facilities, compared to 37.4 per cent in 1979. The major area of increase was in water supply projects, which increased from 7 per cent of funds in 1979 to 23 per cent in the final year.

Neighbourhood improvement, municipal buildings, and recreational facilities all received increased funding in actual dollar terms in 1980, but the proportion which they represented of total allocations declined from the previous year. A number of large projects in these categories were undertaken in Winnipeg. One of the largest (receiving $1.4 million in CSCP funds) involved rehabilitation of a major landfill site in the East Kildonan area of the city. In addition to aiding land acquisition, these funds provided for landscaping of several hectares of land and construction of a wide range of recreational facilities, including a golf course. The second phases of neighbourhood improvement projects were also assisted in the Chalmers, Daniel MacIntyre, and St. Mathews areas. Over the two years of the CSCP, these three projects received a total of $3.1 million in federal assistance.

As in 1979, Winnipeg, comensurate with its share of the provincial population, received three quarters of all 1980 Manitoba allocations.

TABLE 13: SUMMARY OF 1980 MUNICIPAL ALLOCATIONS IN MANITOBA

Category	CSCP Contribution	% of CSCP Total	No. of Projects	No. of* Communities
Sewage treatment and trunk sewers	$2 326 764	22.3	29	22

TOTAL	$10 450 000	100.0	112	80

* Total does not equal sum of column due to doublecounting.

A. ELIGIBLE PROJECTS

1. Planning and installation of sewage trunk lines and treatment facilities in new and existing areas.

2. Planning and installation of community water supply facilities in new and existing areas.

3. Planning and installation of trunk storm sewer systems.

4. Neighbourhood improvement and conservation planning for upgrading older low-income neighbourhoods, provision of open space and community facilities, relocation of people displaced by the provision of additional facilities, upgrading local services within the neighbourhood, etc.

5. Facilities which convert municipal waste to energy.

6. Community recreational facilities.

7. Renovation, replacement or new construction of municipal buildings.

8. Non-profit housing, the municipal equity.

Shareable expenditures were determined by the Province in accordance with guidelines issued by the Province to assist municipalities in the preparation of project applications.

B. ALLOCATION CRITERIA

All incorporated towns and cities having a population of 6 000 or more persons on 1 June 1976 were eligible for a formula entitlement:

1979 entitlement = \$ 8.50 per capita;
1980 entitlement = \$14.10 per capita.

All other units of local government were permitted to submit project applications for approved categories of expenditures to the Province, which could reject, request revisions or approve such applications. Those projects receiving approval were collectively eligible for a formula entitlement. This was calculated by dividing total unallocated funds for 1979 and 1980 remaining from the allocations to larger centres by the combined population of smaller centres with approved projects. The resulting contribution to communities of less than 6 000 inhabitants was \$8.63 per capita for each program year.

The program was jointly administered with the Ministry of Urban Affairs and the Ministry of Municipal Affairs.

SASKATCHEWAN

Consistent with the trend in many other provinces, there was a significant increase in the proportion of 1980 funds applied to sewer and water projects in Saskatchewan. Municipal infrastructure, which accounted for 49 per cent of 1979 funds, increased to 76 per cent of 1980 allocations. Funding for water supply and storm sewer undertakings experienced the largest proportional gains.

Allocations for all other categories of eligible works declined in 1980. Recreational facilities, for example, which accounted for 28 per cent of 1979 contributions, received only 2 per cent of 1980 funding, while the proportion of funds allocated to neighbourhood improvement declined from 16.2 per cent to 4.7 per cent.

There was also a slight shift in the distribution of funds from larger centres to the province's many small communities. Municipalities with fewer than 5 000 inhabitants received 45 per cent of 1980 funds, compared to 39 per cent of 1979 allocations. These small centres accounted for 127 of the 153 projects assisted in the final program year. Eighty-four per cent of recipient municipalities had less than 1 000 inhabitants.

TABLE 14: SUMMARY OF 1980 MUNICIPAL ALLOCATIONS IN SASKATCHEWAN

Category	CSCP Contribution	% of CSCP Total	No. of Projects	No. of* Communities
Sewage treatment and trunk sewers (1)	$1 341 000	17.4	16	16
Water	2 572 000	33.4	54	49
Sewer and water	466 000	6.1	13	12
Trunk storm sewers (1)	1 472 000	19.1	5	4
Recreational Facilities	142 000	1.8	1	1
Cultural facilities	77 000	1.0	2	2
Neighbourhood Improvement	361 000	4.7	4	2
Streets and Sidewalks	1 025 000	13.3	56	51
Fire Protection	138 000	1.8	1	1
Municipal Buildings	107 000	1.4	1	1
TOTAL	$7 700 000	100.0	153	116

* Total does not equal sum of column due to doublecounting.

(1) A $1 428 000 contribution for sanitary and storm sewers in Saskatoon was apportioned equally between these two project categories.

A. ELIGIBLE PROJECTS

1. Sewage treatment plants and trunk lines in new and existing areas.
2. Community water supply facilities for new and existing areas, including trucked, as well as piped, water supplies.
3. Trunk storm sewer systems, holding tanks and any treatment facilities required in new and existing areas.
4. Social and cultural facilities, including libraries and community centres.
5. Community recreational facilities.
6. Neighbourhood improvement and conservation.
7. Upgrading insulation of municipal buildings and community facilities.
8. Facilities which convert municipal waste to energy production.
9. Municipal equity in non-profit housing.
10. Sewer and water site services provided for residential land development.
11. Capital expenditures for fire protection (fire halls and major items of equipment).

B. ALLOCATION CRITERIA

1. Funds were allocated on a project basis in the form of a grant of up to 50 per cent of the project costs.
2. Priority was given to those projects which were similar to projects which would have qualified under the NIP.
3. Priority was given to those communities which did not receive a previous NIP allocation or received less than $60 per capita.
4. Other things being equal, priority was given to those projects which were at the most advanced stage of planning and financing and which would incur the greatest eligible expenditure in the 1980 program year.
5. Priority was given to those communities in greatest need of facilities.

The program was jointly administered with the Saskatchewan Ministry of Urban Affairs.

1980 Municipal Allocations in Saskatchewan

Community	Type	Project Description	Provincial* Contribution	Federal CSCP Contribution
Abernethy	vl	Sidewalks	$ -	$ 950.00
Alida	vl	Water Storage Tank and Well	-	11,980.00
Arcola	t	Watermain Replacement	30,307.88	29,253.40
Asquith	t	Paving	-	49,061.60
Balgonie	t	Water reservoir and treatment plant, water supply main	33,662.50	79,000.00
Bangor	vl	Sidewalks	-	1,575.50
		Well pump and tanks	-	424.50
Battleford	t	Water Treatment Plant and Storage Reservoir	86,725.72	162,477.22
		Sewage Pumphouse No. 2	-	15,022.78
Bengough	t	Sewer and Water Mains	-	3,920.00
Benson	vl	Street Improvements	-	2,858.50
		Street Lights	-	491.50
Bienfait	t	Paving	-	80,000.00
Biggar	t	Street Lights	-	13,084.04
		Sidewalks and Curbs	-	415.96
Big River	t	Sewage Lagoon	39,172.50	79,540.00
Bjorkdale	vl	Street Improvements	-	14,000.00
Bracken	vl	Extension to Dugout	-	52.50
		Water System	-	447.50
Broadview	t	Street Improvements	-	86,000.00
Bruno	t	Community Centre	44,850.00	72,000.00
Burstall	vl	Paving and sidewalks	4,536.07	20,000.00
Cando	vl	Water Supply	-	2,100.00

---

*Provincial contributions shown here are only those made directly to specific projects. Most provincial aid to municipalities is accomplished through transfer payments.

SASKATCHEWAN (1980)

Community	Type	Project Description	Provincial Contribution	Federal CSCP Contribution
Canwood	vl	Reservoir and Well	$ 8,988.60	$ 20,000.00
Choiceland	vl	Sidewalks	-	4,800.00
Clavet		Lagoon and Lift Station	105,188.46	143,388.19
Craik	t	Watermain Replacement	51,113.01	37,370.00
Dana		Water and Sewer System	12,773.50	27,620.00
Debden	vl	Paving	-	38,000.00
Delisle	t	Sewage Lift Station and Waterline	-	95,500.00
Demaine		Sewage System	4,725.00	6,850.00
Dinsmore	vl	Sidewalks	-	1,500.00
Drake	vl	Paving	5,032.50	10,000.00
Duck Lake	t	Lagoon Extension	41,500.00	47,000.00
Dysart	vl	Watermain Replacement	-	7,500.00
Eastend	t	Paving	-	25,500.00
Eatonia	t	Paving and Curbing	-	55,000.00
Edam	vl	Sidewalks	-	2,880.00
Edenwold	vl	Lagoon Extension	-	5,117.94
		Water reservoir and treatment improvements	8,242.94	12,382.06
Esterhazy	t	Paving	-	123,410.00
Estevan	c	Residential water supply main and street repair	-	43,678.00
		Water Treatment Plant Improvements	-	46,322.00
Fleming	t	Sewer and Water System	55,345.00	53,500.00
Frobisher	vl	Water Source and street Improvements	-	5,000.00

Community	Type	Project Description	Provincial Contribution	Federal CSCP Contribution
Frontier	vl	Lagoon Extension	$ -	$ 38,368.76
		Paving	38,500.00	24,131.24

ALBERTA

In 1980, $17.7 million in federal CSCP funds were made available to Alberta communities in cooperation with two provincial ministries. The Ministry of Environment administered $12.7 million (71.8%) on behalf of municipal infrastructure projects. The Ministry of Housing and Public Works was responsible for $5 million (28.2%) for projects involving cultural and recreational facilities as well as neighbourhood improvement.

Many of the infrastructure facilities undertaken in both years of the Program were components of the regional water and sewer systems planned under the Provincial Regional Utilities Program. Initiated by the Ministry of Environment in 1979, the program provided for a network of services radiating out from several Alberta centres to nearby towns and villages experiencing population growth. The concept employed one set of pipelines to deliver water outbound from the cities and another to bring sewage into large mechanical treatment plants. The schemes enable smaller communities to provide high quality services at reasonable cost by taking advantage of the economies of scale offered by large centralized water purification and sewage treatment facilities.

Edmonton, in particular, has been the centre of considerable regional infrastruture activity. Expansion of the Gold Bar sewage treatment plant, which will be tied to a dozen municipalities in the area, and construction of trunk sewer lines received $2.5 million in CSCP assistance under the two years of the Program. A similar facility was constructed in Calgary, with almost $1.5 million in 1980 CSCP contributions for the plant, pumping station and feedermains.

TABLE 15: SUMMARY OF 1980 MUNICIPAL ALLOCATIONS IN ALBERTA

I. Ministry of Environment:

Category	CSCP Contribution	% of CSCP Total	No. of Projects	No. of* Communities
Sewage Treatment/ Collection	5 039 141	28.5	17	17
Sewers	4 188 035	23.7	19	19
Water Supply	3 342 824	18.9	25	25
Storm Sewers	130 000	0.7	1	1
SUB-TOTAL	$12 700 000	71.8	62	57

II. Ministry of Housing & Public Works:

Category	CSCP Contribution	% of CSCP Total	No. of Projects	No. of* Communities
Infrastructure	$ 349 225	2.0	5	3
Community & Cultural Facilities	1 019 588	5.8	13	9
Recreational Facilities	1 345 887	7.6	31	21
Municipal Buildings	761 037	4.3	14	13
Streets and Sidewalks	881 177	5.0	18	17
Neighbourhood Improvement	113 625	0.6	1	1
Fire Protection	529 461	3.0	12	12
SUB-TOTAL	$ 5 000 000	28.2	94	64
TOTAL	$17 700 000	100.0	156	110

*Total does not equal sum of column due to doublecounting.

ELIGIBLE PROJECTS AND ALLOCATIONS CRITERIA

1. Neighbourhood Improvement Component

Funds were available for upgrading older, low-income neighbourhoods, provision of open space and community facilities on a neighbourhood scale, upgrading of level of services within the neighbourhood where these were deficient, non-profit housing projects (the municipal equity) and various other neighbourhood or small town scale improvements.

Eligible projects received federal contributions to a maximum of $100 per capita (assistance levels subject to review for small communities) for communities or neighbourhoods of up to 6 000 population.

2. Municipal Infrastructure

Allocations were made on the basis of current and anticipated growth, the maintenance of acceptable environmental standards, and the health and safety needs of the community. Water Supply Projects, Trunk Storm Sewers, Sewage Treatment, Sanitary Trunk Sewers, and Regional Sewerage/ Water Plans were eligible for assistance.

In the case of excessive per capita costs, a special high cost grant contribution could be made.

1980 Municipal Allocations for Infrastructure in Alberta

Community	Type	Project Description	Provincial * Contribution	Federal CSCP Contribution
Andrew	vl	Sewage Treatment	$ 356,883.44	$269,853.72
County of Strathcona #20 (Antler Lake)	ham.	Sewage System	810,000.00	279,750.00
Bashaw	t	Water Reservoir, Pumphouse and Supply Mains	423,509.21	86,415.26
County of Red Deer #23 (Benalto)	ham.	Sewage Collection and Treatment System	-	143,740.25

BRITISH COLUMBIA

The $25.2 million available to British Columbia communities was, as in the previous year, virtually all allocated to sewer and water infrastructure. Within this category, the distribution of funding resembled that of the first year, with sewers receiving slightly more emphasis in 1980. Of the two non-infrastructure undertakings, a senior citizens centre in West Vancouver was the only project to receive a provincial capital grant (eligible for provincial funds equivalent to 50 per cent of the federal contribution under the old NIP cost-sharing formula). Other municipal projects receive annual debt servicing assistance from the provincial government.

The operation of the program in British Columbia is also noteworthy for the scale of projects involved; at an average of $212 000, federal CSCP contributions per project were among the largest of any province. Recipient communities averaged $387 000 during the Second Program Year.

One of the largest projects involved connecting the Districts of Pitt Meadows and Maple Ridge to the sewerage system of Greater Vancouver. This major undertaking, which required the construction of nearly 11 kilometres of sewer interceptor lines, saved millions of dollars of additional expenditure that would have been required to provide the two districts with their own treatment facilities. In 1980, CSCP provided $2.8 million to the two communities to assist this project. A further $793 000 was contributed for expansion of the Annacis Island treatment plant in the Greater Vancouver Regional District.

Other major projects were located in Capital Regional District, Greater Vancouver, Keremos, and the Central Fraser Valley Regional District.

TABLE 16: SUMMARY OF 1980 MUNICIPAL ALLOCATIONS IN BRITISH COLUMBIA

Category	CSCP Contribution	% of CSCP Total	No. of Projects	No. of* Communities
Sewage Treatment	$ 137 370	0.6	1	1
Sewers	14 089 195	55.9	48	29
Water Supply	10 489 676	41.6	66	43
Sewer and Water	161 092	0.6	2	2
Other	322 667	1.3	2	2
TOTAL	$25 200 000	100.0	119	64

*Total does not equal sum of column due to doublecounting.

ELIGIBLE PROJECTS AND ALLOCATION CRITERIA

1. Sewer and Water Facilities - The CSCP provided a grant of 20 per cent of total capital costs on approved projects. The remaining 80 per cent is borne by the municipality with annual assistance available under the Sewage Facilities Assistance Act and the Revenue Sharing Act. A High Cost Sewerage Grant was also available, being the lesser of 50 per cent of the eligible capital cost of the project or 50 per cent of the portion of the aggregate of previous and present eligible capital costs exceeding $250 per capita.

   Distribution of funds was made on the basis of the financial condition of the proponent municipality, the technical characteristics of the proposed project, and the environmental circumstances of the community.

2. Local Community Improvement Projects - The CSCP provided a grant of 50 per cent of the costs of any approved project, with the remaining 50 per cent made available by the municipality.

   Financial assistance of 50 per cent of estimated costs was available for planning staff time, holding neighbourhood meetings, advertising, etc., specific to potential projects within the determined area.

   Distribution of funds was guided by the financial condition of the proponent municipality, the relative need of the neighbourhood, and the characteristics of the proposed project, including costs and contribution to urban form and amenity.

3. Projects to Convert Waste to Energy - A grant of up to 50 per cent of capital costs was available up to a maximum contribution of $250 000.

   Distribution of funds was guided by the relative needs of the proponent municipalities, the technical characteristics of the project, and the costs and benefits of the proposed demonstration programs.

These were the initially accepted eligible expenditures; however, due to the demand for financial assistance with municipal infrastructure projects, few other applications were entertained.

The program was jointly administered with the Ministry of Municipal Affairs.

1980 Municipal Allocations in British Columbia

Community	Type	Project Description	Provincial * Contribution	Federal CSCP Contribution

---

* Provincial contributions shown here are only those reported as made directly to specific projects. Most provincial aid to municipalities is accomplished through transfer payments. In British Columbia, this includes annual assistance under the Revenue Sharing Act and the Sewerage Facilities Assistance Act.
